**DORMA Concealed Closers: BTS 75 V and RTS 87 Series**

- **Product ID**: BTS 75 V and RTS 87 Series
- **Classification**: Openings (door ways): Door Hardware
- **Manufacturer**: DORMA
- **Contact Name**: Paul Licata
- **Title**: Director of Brand Marketing
- **Phone**: 800-523-8483
- **Email**: archdw@dorma-usa.com

**Description**

DORMA’s BTS 75 V and RTS 87 Series concealed door closers are dependable and versatile for almost any application. Their compact bodies enable them to be used in applications where larger closers would be prohibitive. They can be installed in a number of different configurations, including in standard, narrow or wide door frames, as well as with left-hand or right-hand single- or double-action mounting. The closers are designed for all types of doors and allow the necessary spring adjustments for both barrier-free and non-barrier free openings. A comprehensive selection of accessories ensures that they can be used successfully with a wide variety of door constructions and floor coverings.

**Release Date**: 2015-09-21  
**Expiry Date**: 2018-09-21  

**SUMMARY DISCLOSURE**

The content of this product was assessed for health hazard warnings as required using Pharos.

- **Residuals Disclosure**
  - Measured 100 ppm (ideal)
  - Measured 1000 ppm
  - Predicted by process chemistry
  - As per MSDS (1,000 & 10,000 ppm)
  - Not disclosed
  - Other

- **Full Disclosure of Intentional Ingredients**: Yes
- **Full Disclosure of Known Hazards**: Yes

- **Disclosure Notes**
  - There are no residuals that exist in the product at concentrations of 1,000 ppm or greater. Given that over 98% of the product is comprised of metals and hydraulic fluid, any residuals predicted by the HBN Pharos tool stem from the remaining intentional content that constitutes less than 2% of the product. These residuals are thus expected to be under the 1,000 ppm threshold.

**Contents in Descending Order of Quantity**

- Steel
- Aluminum Alloy (Mixture)
- ZINC
- LUBRICATING OILS
- 2-Propenenitrile, polymer with 1,3-butadiene
- Brass
- Steel
- POLYURETHANE
- POLYISOCYANATE COMPOUNDS
- Polyoxymethylene

**Hazards**

- PBT (Persistent Bioaccumulative Toxic)
- Cancer
- Gene Mutation
- Development
- Reproductive
- Endocrine
- Respiratory
- Neurotoxicity
- Mammal
- Skin or Eye
- Aquatic toxicity
- Land toxicity
- Physical hazard
- Global warming
- Ozone depletion
- Multiple
- Unknown

**Total VOC Content**

- Material (g/L): N/A
- Regulatory (g/L): N/A

- **Does the product contain exempt VOCs?**: N/A
- **Are there VOC-free tints available?**: N/A

**Notes**

**Certifications + Compliance**

- **VOC Emissions**: Not tested
- **VOC Content**: N/A
The HPD Standard is solely a declaration of product content and direct health hazards associated with exposure to its individual contents. It is not a full assessment of environmental impacts from the life cycle of this product. It is not an assessment of risks associated with actual use of the product. It does not address the potential health impacts of substances used or created during manufacture that do not appear in the final product as residuals, nor substances created during combustion or other degradation processes.

This Health Product Declaration was generated following the requirements of the noted Standard version and is valid for a total of three years after date of issue or three months after a substantive change of product contents occurs. Users should verify that this Health Product Declaration is compliant with the most current version of the HPD Standard. Accuracy of claims made in this Health Product Declaration is the sole responsibility of the listed manufacturer and certifier (if applicable). The HPD Collaborative does not warrant any claim made herein, explicit or implicit. The HPD Standard is an “open standard” developed and managed by the HPD Collaborative, a nonprofit organization. For more information, visit hpdcollaborative.org.

**CONTENT IN DESCENDING ORDER OF QUANTITY**

All ingredients must be assessed for health warnings against Priority Hazard Lists, regardless of disclosure level. Priority Hazard Lists and information on the GreenScreen Benchmarks can be found at www.hpdcollaborative.org/hazardlists.

ACUTE AQUATIC

EU H-Statements: H400 - Aquatic Acute 1 - Very toxic to aquatic life (also in EU R-Phrases)

CHRON AQUATIC

EU H-Statements: H410 - Aquatic Chronic 1 - Very toxic to aquatic life with long lasting effects

FLAMMABLE

EU H-Statements: H250 Catches fire spontaneously if exposed to air

REACTIVE

EU H-Statements: H260 In contact with water releases flammable gases which may ignite spontaneously

RESPIRATORY

AOEC: Asthmagen (ARs) - sensitizer-induced - inhalable forms only

**LUBRICATING OILS**

<table>

PBT

DSL: Persistent, Bioaccumulative and inherently Toxic (PBIT) to humans

CANCER

EU CMR (1): Carcinogen Category 2 - Substances which should be regarded as if they are carcinogenic to man (also in EU R-Phrases, EU H-Statements, EU CMR (2))

MULTIPLE

SIN: Classified CMR (Carcinogen, Mutagen &/or Reproductive Toxicant)
Hydraulic fluid used to regulate door closing speed. Users operating the door are not exposed to the oil, which is fully contained by the metal encasement of the closer. As such, the actual risks associated with the closer's installation and use in a building are minimal and the listed hazards can be deemed irrelevant to the end-user.

NOTES
This HPD represents intentional material ingredients present in DORMA’s concealed closer at concentrations of 1,000 ppm or higher. Materials are identified by their CAS registry numbers and cross-referenced with priority hazard lists to identify the hazards (if any) associated with a particular material. As such, HPDs list potential hazards associated with materials in a product and thereby the product itself. This identification of hazards, however, does not equate to the identification of risk or exposure associated with the installation or use of this product. An accurate assessment of risks is suggested in order to better judge the likelihood problems will arise from flagged ingredients.
