Section 1: Summary

CONTENT INVENTORY

Threshold per material
- Residuals and impurities
  - 0 of 1 materials
  - see Section 2: Material Notes
- Per GHS SDS
- Per OSHA MSDS
- Other

Based on the selected Content Inventory Threshold:

- Characterized
- Are the Percent Weight and Role provided for all substances?
  - Yes
  - No

- Screened
- Are all substances screened using Priority Hazard Lists with results disclosed?
  - Yes
  - No

- Identified
- Are all substances disclosed by Name (Specific or Generic) and Identifier?
  - Yes
  - No

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

MATERIAL | SUBSTANCE | RESIDUAL OR IMPURITY | GREENSCREEN SCORE | HAZARD TYPE

CLEAR TEMPERED GLASS - SUPERLITE X [ FLOAT GLASS UNK ]

Number of Greenscreen BM-4/BM3 contents........ 0
Contents highest concern GreenScreen Benchmark or List translator Score.............. UNK
Nanomaterial............. No

INVENTORY AND SCREENING NOTES:

Float glass has be identified by the HPDC Technical Committee as a Special Condition. All process chemistry for this clear tempered glass product occurs within the factory. While this product has not been specifically tested for residuals, it is expected that no residuals remain from these process chemistry reactions.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC Content data is not applicable for this product category.

CERTIFICATIONS AND COMPLIANCE

No certifications have been added to this HPD.

Self-Published*

VERIFIER: SCREENING DATE: October 31, 2016 EXPIRY DATE*: October 31, 2019

Third Party Verified VERIFICATION #: RELEASE DATE: October 31, 2016

*See HPDC website for details

* or within 3 months of significant change in product contents
Section 2: Content in Descending Order of Quantity

This section lists materials in a product and the substances in each material based on the Inventory Threshold for each material. If residuals or impurities from the manufacturing or extraction processes are considered for a material, these are inventoried and characterized to the extent described in the Material and/or General Notes. Chemical substances are screened against the HPD Priority Hazard Lists for human and environmental health impacts. Screening is based on best available information; "Not Found" does not necessarily mean there is no potential hazard associated with the product or its contents. More information about Priority Hazard Lists and the GreenScreen can be found online: www.hpd-collaborative.org and www.greenscreenchemicals.org.

CLEAR TEMPERED GLASS - SUPERLITE X
Inventory Threshold: 1000 ppm
Residuals Considered: No

FLOAT GLASS
%: 100.0000 - 100.0000
GS: UNK
RC: None
NANO: NO
ROLE: Clear float glass specially tempered to meet a 45/60/90 minute fire rating

HAZARDS:
None Found

AGENCY(IES) WITH WARNINGS:
No warnings found on HPD Priority lists

SUBSTANCE NOTES: Float glass has been identified by the HPDC Technical Committee as a Special Condition. All process chemistry for this clear tempered glass product occurs within the factory. While this product has not been specifically tested for residuals, it is expected that no residuals remain from these process chemistry reactions.

Section 3: Certifications and Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

GPX FRAMING - UNFINISHED
HPD URL: No HPD link provided
CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES: SuperLite X-45/60/90 glazing is typically used in conjunction with GPX Framing, though other framing systems can be used.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator, and when available, full GreenScreen assessments. The HPD Open Standard does not provide an assessment of health impacts throughout the product life cycle. It does not provide an assessment of exposure or risk associated with product handling or use. It also does not address potential health impacts of: (i) substances used or created during the manufacturing process unless they remain in the final product, or (ii) substances created after the product is delivered for end use (e.g., if the product burns, degrades, or otherwise changes chemical composition).

The HPD Open Standard was created and is maintained and evolved by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry. The HPD Collaborative is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

A disclosure completed in compliance with the HPD Open Standard is referred to as a “Health Product Declaration,” or “HPD.” The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD Open Standard noted.
